

## PLATFORM LADDERS • FALL PREVENTION • ANCHORS AND LIFELINES

### BUILD SAFETY INTO YOUR FACILITY

System Mechanical and Safety Solutions will assist you with hazard identification and control measures. Our technicians are skilled in the installation, testing and certification of safety equipment. From engineering and design through final inspection and training, our team will help you achieve your safety objectives.

#### PLATFORMS, LADDERS AND CATWALKS

Safe work access increases worker productivity and improves maintenance of plant equipment. Our team provides design, engineering and installation of structural platforms, ladders and catwalks.

Fiberglass reinforced plastic (FRP) aluminum, and steel fabrications. Solutions include:

- Access platforms
- Railing systems
- Catwalks for equipment and plant access
- Fall protection systems
- Fixed and special use ladders
- Gangways and inspection systems

#### FALL PREVENTION RESTRAINT AND ARREST

Design and install fall protection systems on existing facilities for interior and exterior applications.

Fall protection systems include:

- Custom platform and railing fabrication
- Overhead fall protection systems
- Annual testing and certification of your fall protection systems.

- Fall protection anchor testing and certification
- Horizontal lifelines, anchors and fall restraint installation
- Skylight guarding
- Railings and gates for roof hatches and rooftop edges
