

FUME EXTRACTION • MACHINE GUARDING • WORK AREA SEPARATION

BUILD SAFETY INTO YOUR FACILITY

FUME EXTRACTION

Custom and pre-engineered fume extraction systems to remove airborne contaminants at the source. Systems include:

- Filter walls and environmental booths
- Industrial air cleaners
- Ductless filtration systems
- Curtain wall and total enclosure systems
- Portable fume collection units
- Skid mounted mobile systems
- Dust collection

MACHINE GUARDING

A broad selection of automated and manual guarding systems:

- Complete machine process enclosures
- Pneumatic curtains
- Sound attenuation curtains and enclosures
- Fencing and metal grate enclosures
- Automated doors and guards
- Custom curtain enclosures

PLANT WORK AREA SEPARATION:

We design safety enclosures and barriers to separate incompatible work functions. Sound, particulate hazards, flash hazards and temperature are common examples. Solutions include:

- Custom curtain enclosures
- Modular cell enclosures
- Assembly line conveyor enclosures
- Environmental separation curtains for weld, spark and flash hazards
- Perimeter guarding enclosures for robotic process

A safe facility is good business.
