

## PLATFORM LADDERS • FALL PREVENTION • ANCHORS AND LIFELINES

### BUILD SAFETY INTO YOUR FACILITY

System Mechanical and Safety Solutions will assist you with hazard identification and control measures. Our technicians are skilled in the installation, testing and certification of safety equipment. From engineering and design through final inspection and training, our team will help you achieve your safety objectives.

#### HVAC SAFETY:

HVAC Equipment presents unique hazards to maintenance personnel:

- Confined space
- Fall hazards
- Caught, pinch and crush injuries
- Biological hazards
- Electrical hazards
- Burn injuries
- Environmental (Air and Liquid)
- Joint Occupant
- Sound
- Confusing LOTO procedures
- Damage to manufacturing process

Our team has extensive experience with HVAC safety solutions and will evaluate and assist with HVAC safety applications

A safe facility is good business. Call Ryan Brown to schedule a consultation.
